Letter of recommendation

We state that Mr. Milan Aleksic was an intern working for our company as a .NET software programmer. During the six weeks period of his term in ESAProjekt he achieved excellent results and provided us with a modern software tool based on TCP/IP protocol for data exchange with omniscient software in XML format.

We recommend him as a reliable software engineer and analyst. He has good interpersonal skills and easily assimilates as a member of the team.

Chief Business Office
